

South Coast Cactus and Succulent Society

Succulents of the Month October 2010 – *Pelargonium & Sarcocaulon*

In lieu of writing an article that lacks depth and completeness, we are substituting the following links for information on *Pelargonium & Sarcocaulon*. Bear in mind that not all these plants are succulent. We are looking primarily for caudiciform plants in our mini-show.

FYI: The Family **Geraniaceae** now includes the following genera. *Erodium, Geranium, Hypseocharis, Monsonia, Pelargonium, Rhynchotheca, and Sarcocaulon*. *It is not know by me whether all these genera contain species which can be considered succulent, but the answer is probably yes.*

<http://en.wikipedia.org/wiki/Pelargonium>

[There is no Wikipedia entry for Sarcocaulon.](#)
